

Skin-matology Advanced Carboxy Lift Peptide Kit

A 6-treatment professional carboxy lift peptide protocol combining CO₂ activation with peptide firming for a brighter, more toned appearance.

A professional carboxy lift peptide treatment kit for 6 professional treatments (6 x TMT). Step 1: cleanse and prepare the skin. Step 2 (Carboxy Activation & Bohr Effect): apply the Carboxy Gel and Bicarbonate Dry Sheet Mask — as they react, carbon dioxide is generated at the skin's surface, supporting a temporary oxygenation effect intended to contribute to a brighter, more revitalised appearance. Step 3 (Peptide Firming Treatment): apply the Argireline® Peptide Sheet Mask to support the appearance of firmer, smoother and more toned skin. Step 4: finish with moisturiser and broad-spectrum SPF. For optimal results, treatments are recommended every 3–4 weeks. Kit contains 6 x Carboxy gel (25ml), 6 x Face & Neck sheet masks and 6 x Argireline serum sheet masks.

SPECIFICATIONS

Brand	Skin-matology
Technology	Professional carboxy lift peptide protocol

APPLICATIONS

- Skin Rejuvenation
- Skin Tightening
