

# Skin-matology Centella Silk Bright Moisturiser

A targeted brightening and hyperpigmentation-correcting moisturiser enriched with Centella asiatica.

A targeted brightening and hyperpigmentation-correcting moisturiser formulated with a powerful combination of tranexamic acid, kojic acid, alpha arbutin, glycolic acid and liquorice root extract to help improve the appearance of dark spots, uneven skin tone and pigmentation. Enriched with Centella asiatica, known for its soothing and skin-supporting properties, this formula helps calm and comfort the skin while supporting a healthier-looking complexion. For enhanced pigmentation care, use alongside Skin-matology MelanoEase Serum. The moisturiser can be used morning and night, and during the day should be followed with Skin-matology HydraShield SPF 50.
