

Skin-matology MelanoEase Serum

An advanced brightening and pigmentation-correcting serum with tranexamic acid, kojic acid, alpha arbutin and glycolic acid.

An advanced brightening and pigmentation-correcting serum formulated with a powerful combination of tranexamic acid, kojic acid, alpha arbutin, glycolic acid and liquorice root extract. This targeted formula helps reduce the appearance of hyperpigmentation, dark spots and uneven skin tone while supporting a brighter, more even-looking complexion. The active ingredients work together to help inhibit tyrosinase activity, an enzyme involved in melanin production, helping to improve the appearance of pigmentation over time. Use morning and night as part of your daily skincare routine. During the day, always follow with Skin-matology HydraShield SPF 50. For added hydration and comfort, pair with Skin-matology Centella Silk Bright Moisturiser.
